PROFESSIONAL SUMMARY

Ten years building ecommerce and enterprise operations — from Pet Supermarket's first product-data platform to CITY Furniture's Sterling OMS modernization. I turn manual business processes into dashboards, templates, and workflows people actually adopt: a Claude Skill giving any BA traceable, line-level access to requirements, SOWs that opened a new revenue line for FlexShopper's development partners, and executive dashboards surfacing milestones and blockers in real time. AI is a working tool here, not a talking point.

- Built a **Claude Skill** giving any BA on the Sterling OMS project queryable access to the BRDs — answers come back with **traceable IDs** back to the exact source line. (2026)
- Drafted **Statements of Work** for FlexShopper's development partners, scoping category-specific microsites that opened a new revenue line for the business. (2025)
- Built an **AI-assisted, QA-scored pipeline** that turned 1,000+ legacy reports — narrowed to 200 through stakeholder triage — into 20 audit-ready data models. (2026)
