

PHILLIP DA SILVA-MARQUIS

Fort Lauderdale, FL | marquisphill@yahoo.com

PROFESSIONAL SUMMARY

Product Owner and Business Analyst with 10+ years across retail, ecommerce, and fintech technology teams, including 5+ years in dedicated Business Analyst, Business Systems Analyst, and Product Owner roles supporting software development. Owns backlogs end to end, translating stakeholder and organizational needs into epics, features, user stories, research spikes, and defects, then leading refinement, validating delivered work against acceptance criteria, and coordinating releases. Experienced managing competing priorities and escalations across Finance, Accounting, Operations, Merchandising, and Technology stakeholders, and making trade-off decisions with incomplete information in fast-moving environments where requirements evolve mid-flight. Certified PSPO I (Udemy).

CORE COMPETENCIES

- **Backlog Ownership:** Epics, features, user stories, research spikes, defects; acceptance criteria; refinement and sizing
- **Agile Delivery:** Scrum ceremonies across multiple development teams, sprint planning, reviews, retrospectives
- **Prioritization & Trade-offs:** MoSCoW, weighted decision matrices, dependency and risk-based sequencing, scope control
- **Stakeholder Management:** Executive presentations, cross-functional workshop facilitation, escalation across organizational levels
- **Business & Systems Analysis:** BRDs/FSDs, process and data mapping, requirements traceability, current- and future-state analysis
- **Quality & Release:** UAT, acceptance-criteria validation, go-live checklists, defect triage, post-launch support
- **Systems & Integrations:** Logicbroker, NetSuite, IBM Sterling OMS, Syndigo Riversand PIM, Salesforce Commerce Cloud, APIs and webhooks

PLATFORMS AND TOOLS

Jira | Confluence | Asana | SharePoint | SQL | Microsoft Excel | Visio | Figma | Microsoft Office Suite

PROFESSIONAL EXPERIENCE

CITY Home | Tamarac, FL October 2025 – July 2026

Sr. Business Analyst, Enterprise OMS Modernization

- Uncovered 50+ previously undocumented CRM use cases while gathering future-state requirements for customer claims submission, invoice-detail lookup, returns and exchanges, and delivery routing; unblocked the development team's solutioning and established the first documented source of truth for CRM requirements on the OMS program.
- Consolidated a 230+ legacy report inventory down to roughly 20 required reports by building an AI-assisted analysis pipeline and facilitating cross-functional review workshops, requiring every retained report to tie back to a real business action rather than legacy precedent.
- Synthesized 300+ pages of BRDs into a 6-page executive summary using AI-assisted tools, engineering a line-level unique-ID system so every summary statement traced back to its source line; achieved executive sign-off within one week and locked scope early.
- Facilitated week-long, full-day discovery workshops with each of five departments (Customer Care, Commercial Sales, Operations, Accounting, and Technology), securing incremental requirement approval after each session instead of a single end-of-project sign-off, while maintaining traceability to approved source materials.
- Coordinated cross-functional alignment across five concurrent workstreams — report migration, historical data migration, data mapping, Customer Care/CRM, and Commercial Sales — tracking risks, dependencies, and status to keep the enterprise OMS modernization program on track.
- Delivered real-time in-scope versus net-new rulings during design workshops for an associate-facing POS application, citing approved BRD references so scope and acceptance decisions were defensible rather than opinion-based.

FlexShopper Inc. | Boca Raton, FL 2 years

Project Manager, Merchandising (Promoted) March 2025 – August 2025

- Owned the end-to-end lifecycle of the Logicbroker dropship platform, an enterprise-scale system processing approximately 100,000 orders annually, including enhancement planning, vendor onboarding, product-data requirements, order workflows, invoicing, and issue resolution.
- Developed and prioritized a large merchandising development backlog using MoSCoW prioritization to lock in scope, delivering a custom backend rebate application that reduced the rebate process to approximately one week.

- Led and participated in Scrum ceremonies (refinement, sprint planning, reviews, retrospectives) for 3 development teams, advocating for Agile adoption among business stakeholders.
- Presented platform roadmaps, recent enhancements, performance updates, and proposed improvements to the CEO on a monthly basis, contributing to priority-setting and product vision discussions.
- Designed workflows for the company's first Catalog-as-a-Service revenue-sharing program, coordinating requirements across Product, Sales, Legal, Marketing, Merchandising, and Operations; authored related SOPs and MSA sections.
- Partnered with 10 brand and retail companies to launch lease-to-own and financing experiences on partner websites and 3 category-specific microsites, separating day-one launch requirements from future-state automation to keep delivery moving.

Business Systems Analyst / PMO Analyst November 2023 – March 2025

- Translated requirements across Marketing, Merchandising, Accounting, Operations, Product, and Technology into 100+ Jira user stories with acceptance criteria, supported by business requirements, functional specifications, and process workflows.
- Reduced average vendor onboarding from six weeks to two weeks while onboarding more than 35 vendors, redesigning catalog, product, order, and invoice workflows into a repeatable process with clear ownership and handoffs.
- Managed competing priorities across 7 stakeholder groups using process mapping, structured workshops, and weighted decision-making exercises, moving prioritization from opinion versus opinion to agreed decision criteria.
- Troubleshoot API-based dropship platform errors daily, identifying 3 recurring root causes within the first month and implementing process and error-messaging improvements that allowed vendors to self-correct rather than escalate.
- Coordinated go-live planning, UAT, issue resolution, stakeholder communications, and post-launch support for marketplace, financing, billing, and order-management releases; created a go-live checklist that enabled same-day resolution of all post-deployment issues.
- Authored BRDs/FSDs for Logicbroker and custom application integrations, reducing manual remittance work and enabling automated vendor payments.

Pet Supermarket Inc. | Sunrise, FL 2013 – 2023

Ten-year tenure across five progressive roles: Junior Business Analyst (2021–2023) | Web Catalog Specialist (2018–2021) | Digital Marketing Specialist (2015–2018) | Ecommerce Specialist (2015) | Sales Associate (2013–2015)

- Served as Product Owner for the Syndigo Riversand PIM, leading requirements, backlog refinement, sprint planning, and testing of completed items, and coordinating integration with Salesforce Commerce Cloud (SFCC).
- Implemented the company's first product information management (PIM) platform, establishing processes that supported approximately 150 new products per week and onboarded 200+ vendor relationships into PIM workflows across 14,000+ SKUs.
- Defined SQL logic for the PIM–SFCC integration, resolving pricing mismatches and inconsistent product content display between online and in-store systems.
- Redesigned the customer loyalty program and launched the AutoShip subscription service; implemented Oracle Responsys for a 1.5-million-member email audience, improving open rates by 30% through segmentation, automated journeys, and campaign testing.
- Managed ecommerce content and a 14,000+ product catalog across BigCommerce and Salesforce Commerce Cloud, supported the BigCommerce migration and site redesign, and mentored a direct report on web product-data processes.

EDUCATION & CERTIFICATIONS

B.A. in Communication & English, Florida Atlantic University
Professional Scrum Product Owner I (PSPO I) – Udemy, 2023

SIDE PROJECTS

- **South Florida Tech Hub Hackathon (2025):** Collaborated with a cross-functional team in a 48-hour hackathon to design and build an AI relocation-insights app "SoFlo Atlas". Awarded Best Use of AI.
- **Professional Portfolio Website:** Building and maintaining a personal portfolio site from scratch with case studies on Logicbroker, the rebate system, and Catalog-as-a-Service.
