

PHILLIP DA SILVA-MARQUIS

Fort Lauderdale, FL | marquisphill@yahoo.com

PROFESSIONAL SUMMARY

Senior Business Analyst with 10+ years spanning frontline retail, digital catalog and marketing operations, and enterprise systems delivery. Most recently led requirements for CITY Home's IBM Sterling OMS modernization — rationalizing 1,000+ legacy reports down to roughly 20 and getting executive sign-off on 300+ pages of BRDs within a week through a line-level traceability system. Comfortable owning a platform end-to-end: workshop facilitation, BRD/FSD authoring, SQL-based data mapping, UAT, and briefing stakeholders from finance to engineering. Certified PSPO I (Udemy).

CORE COMPETENCIES

- **Business Analysis & Requirements:** BRDs/FSDs, requirements elicitation, user stories, acceptance criteria, UAT
- **Systems & Integrations:** Data mapping/SQL logic, Logicbroker, NetSuite, Syndigo Riversand PIM, Salesforce Commerce Cloud, IBM Sterling OMS
- **Agile Delivery & Product Ownership:** Scrum (PSPO I - Udemy), backlog refinement, sprint planning, MoSCoW prioritization
- **AI-Assisted Process Improvement:** Requirements synthesis, report rationalization, traceability systems, adoption-program design
- **Stakeholder & Executive Communication:** Workshop facilitation, cross-departmental alignment, executive presentations
- **Change Management & Documentation:** SOPs, go-live planning, training and documentation, process improvement

PLATFORMS AND TOOLS

Logicbroker | NetSuite | Syndigo Riversand PIM | Salesforce Commerce Cloud (SFCC) | IBM Sterling OMS | SQL | Oracle Responsys | Jira | Confluence | Asana | Excel | Visio | Figma | SharePoint | PowerPoint

PROFESSIONAL EXPERIENCE

CITY Home | Tamarac, FL

October 2025 – July 2026

Sr. Business Analyst, Enterprise OMS Modernization

- Documented future-state requirements across CRM workflows — claims submission, invoice lookup, returns/exchanges, delivery routing — for the OMS rebuild.
- Uncovered 50+ undocumented CRM use cases along the way, giving engineering its first real source of truth for requirements.
- Ran week-long discovery workshops with five departments, approving requirements session-by-session instead of waiting until the end.
- Noticed in the first two weeks that incoming requirements had no prioritization method, and reworked the Jira board and workshop intake to require one — helping lock scope earlier.
- Reviewed 1,000+ legacy reports with department stakeholders and built an AI-assisted scoring pipeline, narrowing the list to roughly 20 needed reports.
- Synthesized 300+ pages of BRDs into a 6-page executive summary with line-level traceability back to source, earning sign-off in one week.
- Designed "Prompt & Tell," a grassroots AI-adoption program built around a virtual sticky-note board, intentionally approachable rather than a data-collection ask — still growing when a layoff cut it short.
- Coordinated five concurrent workstreams — report and data migration, data mapping, CRM, and Commercial Sales — tracking risk and status.
- Bridged CITY Home's two remaining legacy-system engineers and IBM's implementation team across three sequenced discussions in two weeks, replacing circular conversations with a documented mapping plan.

FlexShopper Inc. | Boca Raton, FL

2 years

Project Manager, Merchandising (Promoted) — March 2025 – August 2025

- Owned the Logicbroker dropship platform end-to-end — about 100,000 orders a year — from vendor onboarding through invoicing and issue resolution.
- Designed the company's first Catalog-as-a-Service revenue-share program, coordinating requirements across Product, Sales, Legal, Marketing, and Operations.
- Built and prioritized the merchandising backlog with MoSCoW, delivering a backend rebate app that cut the rebate process to about a week.
- Led Scrum ceremonies for three development teams, advocating Agile adoption among stakeholders.
- Presented platform roadmaps and performance updates directly to the CEO every month.

Business Systems Analyst / PMO Analyst — November 2023 – March 2025

- Onboarded 35+ vendors by redesigning catalog, product, order, and invoice workflows, cutting onboarding time from six weeks to two.
- Translated requirements from six departments into BRDs, FSDs, and 100+ Jira user stories.
- Authored BRDs/FSDs for the Logicbroker integration, replacing manual remittance with automated vendor payments.
- Owned the business side of the Logicbroker-to-NetSuite invoice integration, evaluating and pushing back on the third-party developer's proposed solutions using firsthand API knowledge.
- Built a go-live checklist that resolved every post-deployment issue the same day, across UAT, launch, and post-launch support.
- Managed competing priorities across seven stakeholders through process mapping and structured, weighted-decision workshops.
- Traced three recurring Logicbroker errors to their root causes within the first month and fixed the process gaps behind them.

Pet Supermarket Inc. | Sunrise, FL

2013 – 2023

Progressive roles: Junior Business Analyst (2021–2023) | Web Catalog Specialist (2018–2021) | Digital Marketing Specialist (2015–2018) | Ecommerce Specialist (2015) | Sales Associate (2013–2015)

- Owned the Syndigo Riversand PIM as product owner — requirements, backlog, sprint planning, testing — coordinating its integration with Salesforce Commerce Cloud.
- Launched the company's first PIM platform, bringing 200+ vendors and 14,000+ SKUs into a structured catalog process.
- Defined the SQL logic behind the PIM-SFCC integration, fixing pricing mismatches and inconsistent product content between channels.
- Ran ecommerce content and a 14,000-product catalog across BigCommerce and SFCC — promotions, navigation, SEO, and BOPIS support.
- Rebuilt Oracle Responsys email marketing for a 1.5-million-member list, lifting open rates 30% through segmentation and automated journeys.
- Mentored a direct report on web product-data processes, tightening team accuracy and consistency.

EDUCATION & CERTIFICATIONS

B.A. in Communication & English, Florida Atlantic University

Professional Scrum Product Owner I (PSPO I) – Udemy, 2023

SIDE PROJECTS

- South Florida Tech Hub Hackathon (2025): Built an AI relocation-insights app in a 48-hour hackathon with a cross-functional team — awarded Best Use of AI.
